Mom what are you making for dinner?

Mom is making spaghetti for dinner.

Yummy my favorite.

Spaghetti!

Pablo, Sophia, dinner is ready, go wash your hands.
The food was delicious mom.

Am glad you liked it, now you two go brush your teeth.

Yes mom.

I don’t understand why we have to brush our teeth after eating.

Because it helps prevent cavities.

Ok kids, time to go to sleep, did you brush your teeth?

Yes mom.

Why did you lie to mom? You didn't brush your teeth.

I don’t see why I have to brush my teeth after eating, nothing is going to happen.
Sophia are you okay?
I don't know, I been having a tooth ache lately
That's for never brushing your teeth after eating.
Ouch!!!!

I already called your mom, she is on her way.
Good.

Thank you.
What happened?

And why do you have a tooth ache?
I have a tooth ache.
Mom I haven't been brushing my teeth after eating.

I didn't think anything was going to happen.

Why not?

I say it for your own good, brushing your teeth is the only way to keep your teeth healthy and strong.

I told her mom, but she didn't listen.

It looks like you have a cavity.

Oh man!!! I should have listened to you mom.

I know, I'm sorry.

It's okay, let's get you to the dentist.

It's okay, now you know.
All done, now remember that with brushing and flossing at least twice a day you'll have healthy teeth and gums.

Thank you, I will do that.

Thank you doctor.

Yes sis.

The End.
